PROFESSIONAL SUMMARY

AI/ML professional with completed 6-month internship experience in Python, Machine Learning, Generative AI, SQL, and AI application development. Skilled in RAG, NLP, Computer Vision, Flask, REST APIs, Docker, and vector databases. Experienced in developing practical AI/ML applications and deploying machine learning solutions.

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: Machine Learning, Deep Learning, Computer Vision, TensorFlow, Keras

Generative AI: RAG, Agentic AI, LangChain, Hugging Face, OpenAI API, NLP, Embeddings, Vector Databases, ChromaDB

Data Analysis: Pandas, NumPy, Excel

Databases: MongoDB, MySQL

Web & API Development: Flask, REST APIs, Streamlit, HTML, CSS

Deployment: Docker

Tools: Git, GitHub, Jupyter Notebook

INTERNSHIP EXPERIENCE

AI/ML Intern | Labmentix

March 2026 – September 2026 | 6 Months

Completed a 6-month AI/ML internship with hands-on experience in Machine Learning and Generative AI.

Built AI-powered applications using Python, Flask, and REST APIs.

Worked on SQL, data analysis, machine learning tasks, and application deployment.

Participated in team projects and applied modern AI/ML tools and frameworks.

PROJECTS

Voyage Analytics – AI/ML Travel Analytics

Technologies: Python, Machine Learning, Flask, REST API, Streamlit, Docker

GitHub: <https://github.com/SuperSam9276/Voyage-Analytics>

Developed a travel analytics application for flight price prediction, gender classification, and hotel recommendation. Integrated ML models with Flask REST API and Streamlit.

AI Travel Planner (Agentic AI)

Technologies: Python, Agentic AI

GitHub: <https://github.com/pathiputturuyamini1995-hash/travel-agentic-ai-project>

- * Developed an AI-powered travel planning assistant.
- * Generated personalized travel itineraries.
- * Provided travel recommendations and trip planning support.

RAG PDF Chatbot

Technologies: Python, LangChain, ChromaDB, Hugging Face

GitHub: https://github.com/pathiputturuyamini1995-hash/rag_pdf_chatbot

Developed a chatbot that answers questions from uploaded PDF documents. Implemented Retrieval-Augmented Generation (RAG) architecture. Used vector embeddings for efficient document retrieval.

AI Text Summarizer

Technologies: Python, Hugging Face, NLP

GitHub: <https://github.com/pathiputturuyamini1995-hash/ai-text-summarizer>

Built an AI-powered text summarization application.

Generated concise summaries from lengthy text documents.

Applied Natural Language Processing techniques.

EDUCATION

B.Tech – Electronics & Communication Engineering

Srikalahasteeswara Institute of Technology

2012 – 2016

Aggregate: 77.9%

CERTIFICATIONS

- AI/ML Internship Certificate – Labmentix | 6 Months | 2026
- Oracle Cloud Infrastructure 2025 Certified AI Foundation Associate
- Oracle Cloud Infrastructure 2025 Certified AI Vector Search
- Generative AI for Beginners
- Building Generative AI Powered Apps with Python
